Individual Peer Evaluation Form

Your name: Harlan Wittlieff

Write the name of your classmate you are preparing this review for in the designated column. Using a scale of 1-4 (1=strongly disagree; 2=disagree; 3=agree; 4=strongly agree) answer each question. If you aren't able to answer the question based on what is posted in the discussion board, reach out to your classmate for more information via the discussion board. Total the numbers in each column. **Make sure to answer the questions on the 2nd page.**

Evaluation Criteria	Peer Name: Erin Howland
Has plan in place to complete course project.	4
Has found datasets/data sources to support project idea.	4
Has solidified project idea.	4
Has identified resources for project.	4
Topic is related to data science and demonstrates topics learned to date through program.	4
Risks and potential issues have been identified.	4
TOTALS	24

Feedback on Individual's project topic:

1. How clear is the classmate's project topic? What questions does their topic make you consider?

Erin's project topic is clear. Her focus is on clutch completion across penguin types. The correlation heatmap Erin created for project milestone 3 provided a useful visual of the correlation types and strength among variables.

2. What risks or issues should your classmate consider while working on their project?

The data set does not have many examples that may make learning difficult with only 333 rows. Additionally, the data is heavily weighted toward "yes" results of clutch completion.

3. Additional suggestions/comments that might be beneficial to your peer?

Erin has a well laid out plan for her next steps toward creating the classification models.
